

## cobblestone pattern | pattern a

To calculate the *number of modules* required for the floor area, divide the total floor area by the total square footage of each module. Hence, for this pattern, a 300 sq ft floor would require:

$$300 / 16.00 = 18.75 \text{ modules}$$

size	module composition			number of modules	sq ft req'd of each tile
	pieces	sq. ft. / pc.	total sq. ft.		
8" x 8"	4	0.44	1.76	x	_____
8" x 16"	4	0.89	3.56	x	_____
16" x 16"	6	1.78	10.68	x	_____
<b>Total</b>			<b>16.00</b>		_____
